

Quick Start Guide for the E MR229

This guide is not a substitute for the user manual!

Plug in the power lead and switch on the system using the green switch.

The display lights up and you can set the temperature and heating level:

Temperatur Mischgut	Mixture temperature
SOLL	SETPOINT
Heizstufe	Heating level
Betriebsbereit	Ready for operation

You can adjust the temperature (SETPOINT) and the heating level by pressing the arrow keys:

- Heating level 1: lowest heating level
- Heating level 10: highest heating level

The heating can be switched on using the push-button:

Heizen AN / AUS	HEATING ON / OFF
-----------------	------------------

Quick Start Guide for the E MR229 Motor-Agitator-Boiler

Item number: 81001 0000

When the heating is switched on, the button lights up green.
As soon as the preset temperature is reached, the button flashes. The heating switches off automatically.
When the boiler cools down, the heating switches back on automatically.

The agitator is switched on using the following button:

Rühren AN / AUS

STIRRING ON / OFF

As soon as the agitator is switched on, the button lights up green. It is essential to ensure that the agitator can rotate freely. If the agitator becomes blocked by the mixture, a safety device in the control cabinet will trip.

If this is the case, the control cabinet must be opened. In the top right-hand corner there is a component labelled -2F11.

Press the black button labelled 'START' firmly until it clicks into place. If the switch cannot be operated, wait a few minutes for it to cool down.

If the motor protection switch trips repeatedly, the mixture is still too stiff to stir or the agitator is blocked for another reason.

If you encounter any other faults or malfunctions, please refer to the user manual!

Please observe the safety instructions!
